ADEGBOYE AYOTOMIDE

SOFTWARE ENGINEER

Lagos, Nigeria | +234 913 129 8538 | adegboyetommy@gmail.com | Ayotomide.netlify.app | github.com/999tommy

PROFESSIONAL SUMMARY

Software Engineer with experience designing and shipping production web applications, backend services, and automation tooling across the full stack. Proficient with Next.js, React, Node.js, and Supabase/PostgreSQL. Track record of improving engineering team velocity, shipping high-engagement frontend features, and owning projects end-to-end from architecture through deployment.

TECHNICAL SKILLS

Core Stack: Next.js / React, TypeScript / JS (ES6+), Node.js / Express.js, Supabase / PostgreSQL, TailwindCSS

Infrastructure & Tools: Docker, Git, CI/CD, Vercel, Render, Serverless Functions

Data & APIs: MongoDB, SQL, REST APIs, WebSockets, Meta API Integration

State & Motion: Redux Toolkit, Framer Motion

EXPERIENCE

Backend Engineer — Handyman (Startup) *Jan 2026 – Mar 2026*

- Designed relational database schemas and optimized SQL queries, reducing load latency on core application endpoints.
- Built REST APIs with strict input validation and consistent contracts, integrated with asynchronous client-side state management.

Full-Stack Developer — Drop Innovation Ltd *2025*

- Re-architected internal tooling and engineering workflows, improving development team velocity by 89%.
- Led feature rollouts that stabilized backend transaction handling and improved secure data delivery, supporting enterprise customer adoption.

Junior Developer — Resavation *Sep 2023 – Jan 2024*

- Optimized multi-parameter search and lookup logic for a high-traffic property marketplace platform.
- Built responsive, cross-device UI components, improving client-side performance and layout consistency.

SELECTED PROJECTS

Axist axist.app — *Next.js, Supabase, PostgreSQL, TailwindCSS, AI Orchestration*

- Built an autonomous workflow SaaS platform using an agent-based architecture to automate non-linear, multistep processes.
- Implemented real-time messaging workers and subscription billing, driving recurring annual revenue.

Naijabiz naijabiz.org — *Next.js, Supabase, PostgreSQL, TailwindCSS, Multi-Tenancy*

- Built a business directory enabling regional merchants to launch lightweight digital storefronts instantly.
- Implemented multi-tenant routing to map and serve isolated vendor storefront endpoints.

EDUCATION

B.Sc., Biochemistry — Federal University Oye-Ekiti 2025

Diploma, Software Development — JIF Technology 2021
