TOMMY ADEGBOYE

SOFTWARE ENGINEER | ROBOTICS ENGINEER

Lagos, Nigeria | +234 913 129 8538 | adegboyetommy@gmail.com | github.com/999tommy | linkedin.com/in/adegboye-tommy-125098254

PROFESSIONAL SUMMARY

Software engineer with experience building production web applications, backend services, REST APIs and database-backed products. Works across React, Next.js, Node.js, TypeScript and SQL. Also developing a robotics engineering practice through robot simulation, online programming and self-directed study, supported by MIT xPRO Robotics Essentials.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, Python, SQL

Software: React, Next.js, Node.js, Express.js, REST APIs, WebSockets

Data and delivery: PostgreSQL, Supabase, MongoDB, Docker, Git, CI/CD, Vercel, Render

Robotics focus: Robot simulation, ROS, OpenCV, MoveIt

EXPERIENCE

IT Engineer Intern | Bank of Industry | Oct 2026 - Present

- Provide first-line support for staff hardware, software, account access and connectivity issues.
- Assist with workstation and application setup, record support requests and escalate issues to relevant technical teams.

Backend Engineer | Handyman (Startup) | Jan 2026 - Mar 2026

- Designed relational database schemas and optimized SQL queries for core application endpoints.
- Built REST APIs with input validation and consistent contracts for client applications.

Full-Stack Developer | Drop Innovation Ltd | 2025

- Improved internal tooling and engineering workflows, and contributed to feature releases for enterprise customers.
- Worked on backend transaction handling and secure data delivery.

Junior Developer | Resavation | Sep 2023 - Jan 2024

- Optimized search and lookup logic for a property marketplace and built responsive cross-device interface components.

SELECTED PROJECTS

Axist | Web application | Next.js, Supabase, PostgreSQL

- Developed full-stack product features, including real-time messaging and subscription workflows.

NaijaBiz | Business directory | Next.js, Supabase, PostgreSQL

- Built business listings and storefront pages, including multi-tenant routing for merchant storefronts.

Robotics Simulation | Independent study | C++, Python, ROS

- Built a robot simulation and programmed robots in online environments as part of ongoing robotics study.

EDUCATION AND CERTIFICATIONS

BSc, Biochemistry - Federal University Oye-Ekiti (2025) | Diploma, Software Development - JIF Technology (2021)

MIT xPRO Robotics Essentials | AWS Solutions Architect | AltSchool Africa Frontend Engineering | NRRT Fullstack Engineering
